

LKS2 Topic: Sport Block D: Football Tournaments Session 2

Researching the bid

Using a tablet or computer, research on the internet to find the biggest stadiums in your chosen country. List them here:

Stadium name	Which city is it in?	How many people can watch a game there?

There are 32 teams that play in the World Cup and they play a total of 64 matches. Can all the matches be held in these stadiums or do you think you'd have to build more? Write down your thoughts here.

--

Football teams, the fans and the TV crews would all need to move around from stadium to stadium. Find the transport links between the stadiums using atlases or an online map. Name the main roads or railways or other transport links.

Roads	Railways	Other transport links, e.g. airports

Which of the stadiums would be used for the final? Choose one that is easiest for the fans to get to and also is the biggest.
