

# Woodstone Henge!

Tribe 3 have been working hard during our Forest School sessions to complete our own version of Stonehenge. We've been using tools to prepare the site, collecting raw materials such as stones and wood, and working together to build triliths.

We worked as a tribe to put our monument together. Some children held our triliths in place whilst others placed rocks into the holes to keep it upright. We all worked together whilst carrying an upturned tree trunk as our altar stone!
