

How are fossils formed?

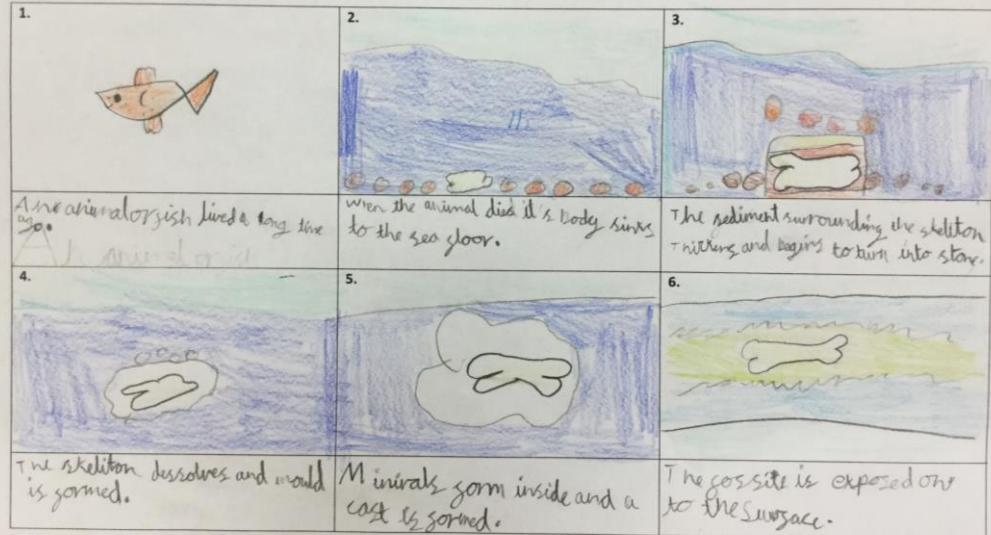

Fantastic Fossils!

As part of our topic, we've been learning all about fossils! We learned how they are formed underground over millions of years and created some comic strips to show the process.

We also have some *real* fossils on display in our classroom! Some of them are over 100 million year old!

Draw pictures to show the stages of how a fossil is formed and write a sentence or two beneath each picture to explain what is happening
