

Flight-testing day has arrived!

After careful measuring, the 'fuel' is added to the rockets.

The rocket is attached to the launch pad ...

The second 'fuel' injectors are in place ...

The engineers wait in anticipation of the launch ... and the countdown begins.

Time to measure and find out which team had perfected their understanding of force by using the best ratio of air pressure to water volume to create forward thrust and uplift.

Counting the trundle wheel clicks to measure the metres flown ...

... and the furthest was an amazing 62m! Well done to Dimitri, Tayte and Joey.
