

Sailing Boats

In our Forest School sessions, we have been busy making sailing boats as part of our topic 'Land Ahoy!' First, we collected suitable sticks. We needed around 8 sticks that were similar in size and shape - the straighter the better! We used loppers to cut some of our sticks to the correct size. After watching a YouTube video about how to make a stick raft, we had a go at tying our sticks together - this was very tricky! Then we secured a mast to our boat (with some adult support). Finally, we attached a leaf for our main sail. We are now looking forward to racing our boats on our Pirate day!
