

As part of our Stargazers ILP, we designed, built and flew rockets!

The children worked brilliantly in teams of three, choosing parts from each of their own designs to add to the final rocket built.

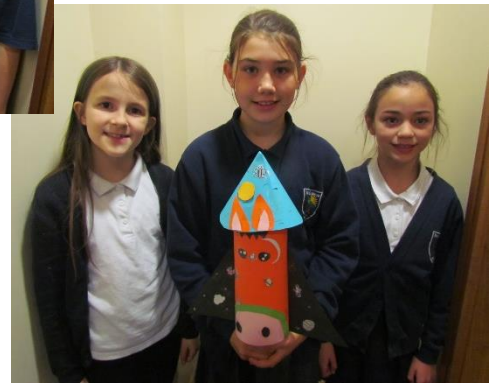

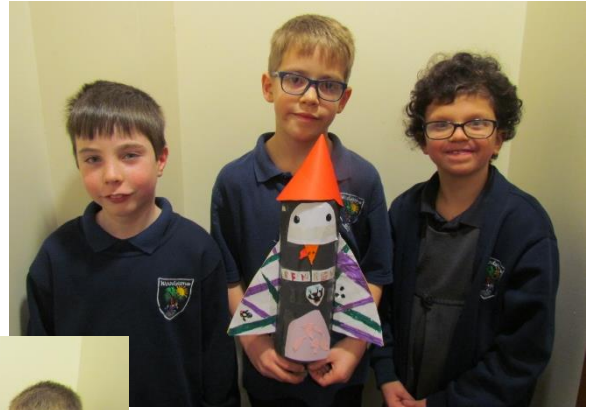

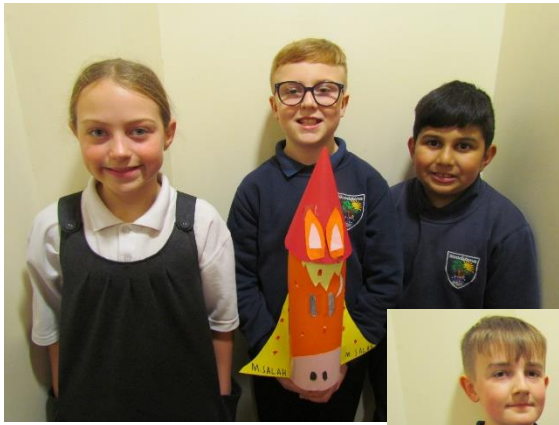

Precision drawing, measuring, cutting and sticking were key skills the team had to master and apply to bring their designs to life.

Look at the pictures below to see how successful we were with our investigation about forces.

The engineers look very proud of their finished rockets.
Time to find out whose will fly the furthest!
