

We've been trying to imagine just how long ago the Stone Age was. So we went outside and performed a test. Each step we took, we travelled back in time by 10 years!

One step back was before anyone in Year 3 was born! 3 steps back was before Mr. Brewin was born! After 100 steps we had travelled back in time by 1,000 years!

However, to get back to the Stone Age, we would have to take **260,000 steps!** That's a long way back!

# Timelines!

Afterwards, we went to complete our own timeline of British history.

A lot has happened in the last 2000 years!
