

Humpty Dumpty Had a Great Fall

Year 2 experimented with materials today to try to protect Humpty Dumpty when he had his great fall. We learnt that **silk** is probably more suitable for clothes than protection whereas **bubble wrap** is a great choice of material for protecting fragile objects.

We also found the **cotton wool** protected Humpty from cracking. However, after feeling the material, we realised there were several layers of cotton wool which we guessed would have helped to protect Humpty. So just for fun, we repeated the drop with a thin layer around Humpty and our predictions were correct - poor Humpty Dumpty!
