

Mastering Number

Alongside Reception and Year 1, Year 2 are excited to be trialling a new mastery number project which aims to develop children's sense of number. In addition to our normal maths lessons, we will be completing daily mastery number sessions for around 10-15 minutes.

One element of the mastery number programme involves the use of rekenreks. These counting frames are a simple yet effective way to teach number sense. The beads on the frame can be used to demonstrate the relationships between numbers along with the basic principles of addition and subtraction.

We love our new rekenreks!
