

### Day 9 - Thursday 2<sup>nd</sup> April 2020

Hi Fab 5s! I hope you had a good day yesterday and completed all the tasks successfully! Here are today's tasks and challenges. As always, please remember to do them carefully and to record your answers and written work neatly and clearly, just as if you were in the classroom. **Remain a proud learner!**

Subject	Task	
Maths	1. Add/subtract to 100 sheet. 2. Decimals challenge. Create 6 decimal numbers using a dice or number cards. Ensure that you have a mixture of 4-digit, 5-digit and 6-digit numbers. Again, you can put the decimal point anywhere within the numbers. Today, you are going to do the following calculations to them: a) Order them from smallest to largest. b) Round each to the nearest tenth. c) Double each one. d) Multiply each one by 7. e) Add the three biggest numbers. Get an adult to check your answers.	
English	Begin to write your Alchemy Island adventure story. Follow your plan and make sure that you include effective and interesting descriptions. Check your punctuation and tense as you write too.	
Science	Create your own material - a replacement for the plastic we are trying to use less of. Using ideas from the investigations and research you have done this week, describe its properties, chemical information and what it can be used for. Make sure that it's something we would find very useful in our world today but something that's not going to cause damage to the environment or animals. You can draw a picture of it and even try to make a model of it if you want to.	
Physical	Create a new ball game. Think about the rules and aims of the game, how many players it's for and the equipment you will need to play it. Keep it simple to follow and lots of fun to play. Good luck!	Join in with the Joe Wicks 9.00am School Workout on YouTube. Everyone's doing it!
Challenge	Can you name a country for every letter of the alphabet? Check their spelling and remember capitals!	

Good luck, enjoy and stay safe!
