

Woodstone Henge!

Tribe 3 have worked really well together to create a fantastic replica of the famous prehistoric monument, Stone Henge!

The Heel Stone was used to mark where the sun would rise. We included our own Heel Stone too!

Here's a picture of Tribe 3 happy with a job well done!

We used logs and stones to create 3 separate rings, a centre piece and a Heel Stone.

Triliths were made up of 2 standing stones with another lay on top. You can see our first trilith being placed.
