

Humpty Dumpty Had a Great Fall

Year 2 experimented with materials to try to protect Humpty Dumpty when he had his great fall. We learnt that **fabrics** such as **silk** are probably more suitable for clothes than protection whereas **bubble wrap** is a great choice of material for protecting fragile objects. Some children wondered if a hard material such as metal or plastic would protect humpty better. So just for fun, we repeated the drop, this time placing Humpty in in one of our pencil pots. We watched humpty hit the hard sides as he fell and then he bounced out of the pot - poor Humpty Dumpty!
